The Department of Civil & Environmental Engineering & Earth Sciences (CEEES; http://ceees.nd.edu/) at the University of Notre Dame invites applications for a full-time, non-tenure-track teaching professor position to commence in August 2016. This position is for Director of our new minor in Resiliency and Sustainability of Engineering Systems. Candidates should have a background in civil or environmental engineering and be qualified to teach undergraduate courses in resilience and sustainability with respect to the natural and built environment and earth systems as they apply to engineering decision making, as well as first year general engineering courses. While primarily an undergraduate teaching position, there is the potential to teach graduate courses and perform research in the candidate’s area of expertise. We are seeking individuals who are engaging and exceptional teachers and who have the relevant background and genuine interest to connect the unique blend of civil, environmental, and earth sciences that the CEEES Department offers to educate the next generation of leaders and decision makers in resilience and sustainability of engineering systems. Qualifications include a Ph.D. or M.Sc. in civil or environmental engineering and previous teaching experience showing an exceptional teaching record. Candidates with professional experience and a Professional Engineering (PE) license or the willingness to obtain the PE are encouraged to apply. Candidates are expected to exhibit dedication to excellence in teaching and professional service. The application should include a cover letter addressing preparation for this position, detailed curriculum vitae, a statement of teaching experience/interests, and names and contact information of at least three references. Applications should be submitted online at http://ceees.nd.edu/position-available as a single PDF. Review of applications will begin immediately and applications will be accepted until the position is filled. The University of Notre Dame is committed to diversity and equality in education and employment, and women and members of underrepresented minority groups are strongly encouraged to apply. The University also supports the needs of dual career couples and has a Dual Career Assistance Program in place to assist relocating spouses and significant others with their job search. Inquiries related to this search can be directed to Dr. Yahya Kurama, Chair of the Search Committee, at ykurama@nd.edu.
